Subject: Testimony

Dear Garry,

Following our telephone conversation I thought I would do this right away before the summer gets on top of us. We installed the ionising chamber last year on our pool in France and have been simply delighted with the results and in particular the quality of the water. It was easy to install, our pool man had no trouble fixing it. We had a completely painless summer bar one incident when the water did turn, this however was because we did not get the copper level up sufficiently. Once rectified there were no further problems. We look forward to another trouble free summer.

We are a little nervous on the re-opening side of the pool but are glad to have you at the end of the line.

I shall pass your details on to my sister in law in Norfolk who may be changing her system. We are recommending the ioniser.

I wish you all the best with this system and your mail has just come in! I will stay in touch.

Regards

E Bellord.

UPDATE No.1

Dear Garry,

Two months down the line in our second season with your system and we wanted to say how fantastic it still is! Not a glimpse of green and we even left the pool for a week in the hot weather and came back to find it perfect.

Hope you are having a good season.

Regards

Elisabeth Bellord
