

share the magic...

Date – 11.06.2010

Dear Gary

It has been very remiss of me not to write a piece for your website and please use any quote from my emails and all I can say is that the service that I have had from you is second to none and the pool in its second year at Villa in the Vineyard is perfect, to quote my wife "it's fantastic to swim in a chlorine free pool" no smell, sensitivity or any worries about any toxic effects of chemicals. Our clients love it and it is so easy and cheap to maintain. I cannot understand why all pools do not use copper systems. Over the winter we did not need any chemicals and it was easy to open for the summer.

Many thanks

Phil
